Title: Learn about Django

Description: Django Poll App

Content: Django is a free and open source web application framework, written in Python. A web framework is a set of components that helps you to develop websites faster and easier. This is a perfect tutorial for getting started. Choose the tutorial as per the version of your django installed. One can go with the latest: <https://docs.djangoproject.com/en/1.11/intro/tutorial01/> You can install it using: `sudo apt-get install python-django` I had followed the above link to make my django app. I used django version 1.7 and python 3+ Here I am going to discuss about some of my struggles in doing this work: This app is basically that people can view poll and can vote in that. Admin can add, delete or change polls.
