Practical-11

Aim: Create a PHP file to print text using Variables.

using variables. <!DOCTYPE html>

<html>

<body>

<?php

$txt = "PHP";

$x = 5;

$y = 10.5;

echo "<center>$txt</center>";

echo "

";

echo "Download the latest $txt $x ZIP package from www.php.net/downloads.php

As always, virus scan the file and check its MD $x checksum using a tool such ass fsum.

";

echo "<br>";

echo "Your score in PHP is $y";

echo "<br>";

?>

</body>

</html>
